Which of the following option is not a state of object in Hibernate? *   1 point

○ Detached()

◉ Attached()

○ Persistent()

○ Transient()

_____is not a core interface of Hibernate. *   1 point

○ Criteria

○ Session

○ Configuration

◉ SessionManagement

Which of the following method is used inside session only? *   1 point

○ merge()

◉ update()

○ end()

○ kill()

In which file database table configuration is stored? *   1 point

○ .dbm

◉ .hbm

○ .ora

○ .sql

Which of the following is not a session method? *   1 point

○ Session persist()

○ Session.saveorupdate()

◉ Session.remove()

○ Session.save()

Which of the following is not a core component of Hibernate? *   1 point

○ Configuration

○ Session

◉ JDBC

○ SessionFactory

_____are most common configuration methods of Hibernate Configuration

* 1 point

○ Mapping files

○ Http.conf

○ Web.config

◉ XML Configuration hibernate.cfg.xml

What is lazy loading? *

1 point

○ used primarily for read-mostly data in cases where it's essential to prevent stale data in concurrent transactions

○ This strategy works with data that can be altered and can tolerate a small chance of stale data.

○ where objects are loaded as needed, instead of an entire page,

○ used in the presentation layer when using JavaScript and server-side code before processing.

Match the following *

2 points

	This state describes an object that was formerly Persistent and associated with a Hibernate session. Developers can reattach the object to a Hibernate session by using either update() or saveOrUpdate().	This state describes objects associated with a Hibernate session.	This state describes new objects that are created in Java but not associated with a Hibernate session.
Transient.	○	○	◉
Persistent	○	◉	○
Detached	◉	○	○
